

UV FITOVERS®

EYEWEAR

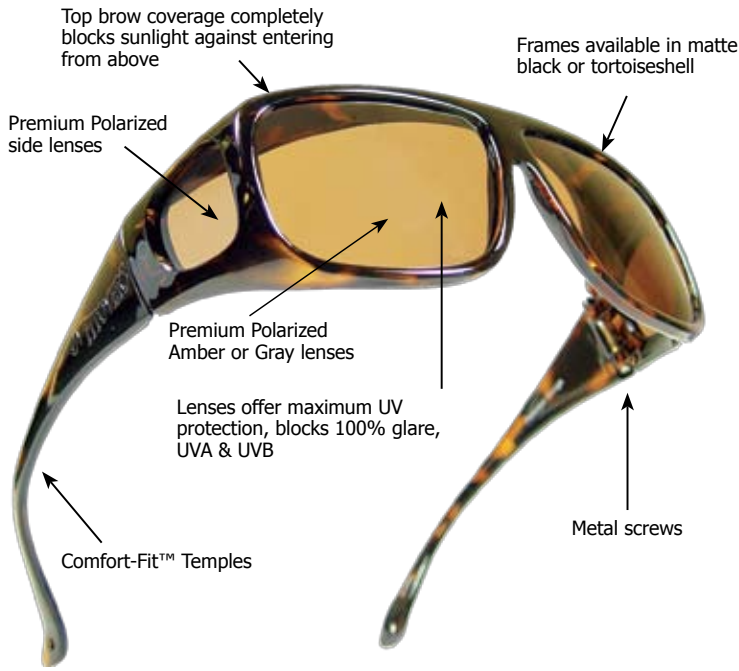

Designed to be worn over prescription eyewear after surgery

Your Post Surgery Low Cost Solution

Send Your Patients home with the comfort and protection of UV Fitovers® Products

All UV Fitovers® Products are polarized and block out 100% of harmful UVA and UVB rays

UV Polarized Gray Lenses

Blocks out 100% of harmful UVA and UVB rays, maintaining true color in all conditions regardless of varying light. UV Polarized Grey lenses filter out 86% of visible light, protecting the retina after surgery.

UV Polarized Amber Lenses

Blocks out 100% of harmful UVA and UVB rays, increasing contrast and providing greater visual acuity. UV Polarized Amber lenses filter out 84% of visible light and block blue light up to 400 nm, protecting the retina after surgery.

Call Today for some unique marketing ideas of how you can incorporate UV Fitovers into your post surgery kit.
